Valentin Silvio Nolasco

Software Developer | Web | Mobile | AI Automation | Cybersecurity

valentin.nolasco123123@gmail.com | +54 9 2657 359495 | nolasko7.github.io | Villa Mercedes, Argentina

Professional Summary

Software Developer from Villa Mercedes, Argentina with real projects in production. Specializes in building complete products: AI-powered appointment systems, WhatsApp and LLM automations, mobile apps, and web platforms. Currently pursuing a Systems Engineering degree, and holds the Google Cybersecurity Professional Certificate (Coursera), with solid knowledge of information security, SIEM tools, system monitoring, log analysis, incident response, and networking. Experienced with full-stack development, REST APIs, cloud deployment, and CI/CD pipelines. Available to work in English-speaking environments and collaborate with international teams.

Technical Skills

Frontend: React, Next.js, Tailwind CSS

Backend / APIs: Node.js, Express, REST APIs, WebSockets

Mobile: Flutter, Dart, Android Studio

Databases: PostgreSQL, MySQL, SQL

DevOps: Docker, Cloudflare, GitHub Actions, CI/CD

AI / Automation: LLM Integration, WhatsApp API, Chatbots, Natural Language Processing, AI Agents

Cybersecurity: SIEM Tools, System Monitoring, Log Analysis, Threat Detection & Mitigation, Incident Response, Vulnerability Assessment, Security Risk Management, Information Security, Intrusion Detection Systems (IDS)

Security Tools & Scripting: Linux, SQL, Python for Security Automation

Networking: TCP/IP, Network Protocols, Traffic Analysis, Perimeter Security

Featured Projects

Citax — AI-Powered Appointment Management SaaS **In Production**

Next.js | Node.js | WhatsApp API | LLM | PostgreSQL | Docker | Cloudflare | GitHub Actions

- Multi-tenant SaaS platform enabling businesses to set up companies with multiple service providers and independent schedules.
- LLM integration for 100% automated appointment management via WhatsApp: bot interprets natural language, checks availability, and confirms bookings without human intervention.
- Intelligent scheduling with conflict detection, automatic reminders, and cancellation management.
- Admin dashboard for managing companies, providers, schedules, and occupancy statistics.
- Production architecture: Docker + Cloudflare Tunnel + GitHub Actions CI/CD pipeline.

Mi Almacen — Mobile Inventory Management App **In Production**

Flutter | Dart | MySQL | Android Studio

- Android app for full inventory management deployed in real retail stores (convenience stores, small markets).
- Barcode scanning via phone camera for real-time product identification and stock updates.
- Sales module with transaction logging, cash register close, and automatic stock deduction per sale.
- Statistics and earnings dashboard: top-selling products, daily/monthly revenue, and profit margins.
- Central database synchronization for multi-device operation.

Court Reservation System — Web Application

React | Node.js | Express | PostgreSQL

- Platform to digitalize court reservations and payments for real sports complexes.
- Centralized dashboard for facility management, availability control, and payment tracking.

Education & Training

Systems Engineering | Universidad Nacional de Villa Mercedes | 2025 – Present (Third Year)
Computer Science B.Sc. (Incomplete) | Universidad Nacional de Rio Cuarto | 2021 – 2024
Google Cybersecurity Professional Certificate (v.2) | Google & Coursera | Completed, August 2026

Achievements & Certifications

Google Cybersecurity Professional Certificate (v.2) — Google / Coursera **2026**

- Completed an 8-course professional program covering cybersecurity foundations, security risk management, network security, Linux, SQL, and security automation with Python.
- Skills gained: SIEM (Security Information and Event Management) tools, Intrusion Detection Systems (IDS), Incident Response, Security Risk Management, Network Security, Vulnerability Assessment, Threat Detection & Mitigation, Linux, SQL, and Python for Security Automation.
- **Verify:** https://www.credly.com/go/rEaI6RrH

Security Operations (SOC) Analyst L1 — Role Readiness **Completed**

- Ready to work as a SOC Level 1 Analyst: meets the core technical requirements in security fundamentals, network security, SIEM tools, log analysis, and incident response.
- Currently deepening hands-on blue-team skills through TryHackMe's SOC Level 1 learning path (Splunk, threat detection, security monitoring).

NASA Space Apps Challenge — International Hackathon | Certificate of Participation (NASA / ESA) **2025**

- Built a technological solution as part of a team under strict time pressure.
- Collaborative work, problem-solving, and effective communication in an international team.

Languages

Spanish: Native

English: Intermediate – Fluent technical reading, effective written and verbal communication, documentation, and ability to work with international teams in English-speaking environments.
